PROFILE SUMMARY

Results-driven Full Stack Developer with experience in designing, developing, and maintaining scalable web applications using React.js, TypeScript, Node.js, Express.js, MySQL, and MongoDB. Proficient in building responsive user interfaces, developing RESTful APIs, implementing secure authentication and role-based access control, and optimizing application performance. Experienced in enterprise solutions including document management, finance management, workflow automation, reporting systems, and dynamic print engines. Strong problem-solving abilities, a commitment to clean and maintainable code, and a passion for delivering high-quality software solutions in collaborative team environments.

WORK EXPERIENCE

Full Stack Developer, Wizzo Technologies, Tirurangadi

Sep 25 - Present

- Developed and maintained scalable web applications using React.js, TypeScript, Node.js, Express.js, and MySQL, delivering responsive and user-friendly interfaces.
- Designed, developed, and integrated RESTful APIs to enable seamless communication between frontend and backend systems.
- Built and enhanced enterprise solutions including document management, finance management, report generation, and workflow automation modules.
- Implemented authentication, authorization, and role-based access control (RBAC) to ensure secure access to application features and data.
- Optimized database performance through efficient schema design, query optimization, and data management using MySQL.
- Collaborated with cross-functional teams throughout the software development lifecycle, including requirement analysis, development, testing, debugging, deployment, and maintenance.
- Developed dynamic reporting and print solutions, including invoice, quotation, work order, and document template generation with PDF export capabilities.
- Integrated third-party services such as email and WhatsApp automation for notifications, document delivery, and customer communication workflows.

Junior Web Developer, Strokx Technologies, Ernakulam

Feb 2025 - May 2025

- Developed responsive and user-friendly front-end components with React.js, leveraging useState, useEffect, and Context API for efficient state management.
 - Built RESTful APIs and backend services with Node.js and Express.js, ensuring seamless integration with MongoDB for data persistence.
 - Designed and maintained MongoDB collections, implementing CRUD operations efficiently using Mongoose ODM.
 - Integrated third-party APIs and implemented secure authentication and authorization using JWT.
 - Participated actively in sprint planning, daily stand-ups, and code reviews, contributing to team productivity and code quality.
 - Utilized tools like Postman for API testing and MongoDB Compass for database visualization and management during development.
-

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2020 - 2024

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

Kerala Higher Secondary (HSE) Class - 12th

2018 - 2020

PROJECTS

Document Management

Developed a comprehensive enterprise management platform to streamline document, service, and financial operations through a centralized dashboard. Implemented role-based access control (RBAC) with dynamic user privileges, ensuring secure access to modules and business data. Built modules for invoice management, quotations, work orders, service records, document management, financial reporting, and commission tracking. Integrated WhatsApp and email automation for customer communications, payment reminders, and document delivery. Enhanced operational efficiency through workflow automation, dashboard analytics, advanced search and filtering, audit logs, and PDF/Excel export capabilities.

Print Engine & Report Designer System

Designed and developed a web-based Print Engine and Report Designer similar to Jasper iReport, enabling users to create and customize printable templates through an intuitive drag-and-drop interface. Built dynamic data-binding capabilities with MySQL for generating invoices, quotations, work orders, reports, labels, and other business documents. Implemented PDF export, print preview, barcode/QR code generation, multi-page layouts, and template version management. Developed RESTful APIs for template design, report generation, and user access control, providing a scalable and flexible document automation solution.

Doctor Appointment Web Application

The "Doctor Appointment Web Application" is a MERN stack-based platform where patients can book, manage, and track doctor appointments, while doctors can manage availability and view appointments. It includes user authentication and appointment reminders.

SKILLS

Programming Languages : JavaScript, TypeScript

Framework : Node.js, Express, ReactJS, FabricJS

Database : MongoDB, MySQL

API : RESTful API

Web Technologies : HTML5, Tailwind CSS, Material Ui

Tools : Git, Postman, NPM, GitHub, GitLab

Soft Skills : Planning, Creative Problem Solving, Adaptability, Analytical Thinking, Team Learning

Languages : Malayalam (Native), English

DECLARATION

I hereby declare that all the information furnished above is true and correct to the best of my knowledge.
